

Solution to Q10.13.1.23

Mayank Gupta

Question: A girl calculates that the probability of her winning the first prize in a lottery is 0.08. If 6000 tickets are sold, how many tickets has she bought?

(A) 40 (B) 240 (C) 480 (D) 750

Solution:

parameter	value	description
Random Variable X	0	She didn't buy the ticket
	1	She bought the ticket
N	6000	Number of tickets sold
$\Pr(X = 1)$	0.08	Probability of winning
$n(X = 1)$	To find	Number of tickets she bought

TABLE 0
INFORMATION TABLE

$$\Pr(X = 1) = 0.08$$

$$\frac{n(X = 1)}{N} = 0.08$$

$$n(X = 1) = 0.08 * 6000$$

$$n(X = 1) = 480$$
