Question: For the following probability distribution

Г	X	1	2	3	4
F	P(X)	1 10	1/5	3	2/5

TABLE 0
PROBABILITY DISTRIBUTION

 $E(X^2)$  is equal to (A)3 (B)5 (C)7 (D)10

**Solution:** As we know

$$E(X^2) = \sum_{X=1}^4 X^2 P(X) \tag{1}$$

$$= (1)^2 \times \frac{1}{10} + (2)^2 \times \frac{1}{5} + (3)^2 \times \frac{3}{10} + (4)^2 \times \frac{2}{5}$$
 (2)

$$=\frac{1}{10} + \frac{4}{5} + \frac{27}{10} + \frac{32}{5} \tag{3}$$

$$= 10 \tag{4}$$

$$\therefore E(X^2) = 10 \tag{5}$$
